

Return to work and return to campus with assured safety and improved compliance while mitigating both communicability and regulatory risks.

REDUCE VIRUS SPREAD BY TRACKING HIGH-CONTACT AREAS

CleanTraQ can be used by both supervisory and custodial personnel to schedule sanitation routes, track completions and ensure that high-traffic, high risk areas are being sanitized within specified timeframes. OSHA's Return to Work Guidance dictates that these areas must be identified and targeted for enhanced cleaning and disinfection to control disease spread. The CleanTraQ platform:

- captures and stores these critical areas
- schedules sanitation tasks
- monitors potential contamination incidents
- tracks completed inspection tours
- enables users to upload digital media with date/time stamping and create custom fields to document information specific to each task

ENSURE COMPLIANCE WITH VALIDATED AND DOCUMENTED SANITATION ACTIVITY MANAGEMENT

Date	Time	Event
06 Monday <small>July 2020</small>	3:00 PM-3:30 PM	Restaurant Sanitation
	3:00 PM-3:30 PM	Restroom Cleaning
	3:30 PM-4:00 PM	Elevator Bank Cleaning
	4:30 PM-5:00 PM	Restaurant Sanitation
	9:00 PM-9:30 PM	Restaurant Closing Procedures
	10:00 PM-11:00 PM	Manager End of Day Inspection
07 Tuesday <small>July 2020</small>	3:00 PM-3:30 PM	Restaurant Sanitation
	3:00 PM-3:30 PM	Restroom Cleaning
	3:30 PM-4:00 PM	Elevator Bank Cleaning
	4:30 PM-5:00 PM	Restaurant Sanitation
	9:00 PM-9:30 PM	Restaurant Closing Procedures

CleanTraQ enables you to verify and report adherence to CDC, OSHA and Department of Health hygiene compliance requirements at your facility while limiting the risk of liability with an audit trail of historical reports that document that status of required and completed sanitation tasks. This helps ensure your organization's ongoing ability to proactively function safely and within required compliance standards.

REDUCE COST AND INCREASE ACCOUNTABILITY WITH ROBUST SANITATION MANAGEMENT AND TRACKING

CleanTraQ is an end-to-end solution that supports streamlined scheduling, tracking and verification that specific sanitation tasks and activities are scheduled, completed and documented as required. The platform eliminates the need for manual tracking of sanitation tasks, and its features include:

- built-in employee training management capabilities
- support for multiple groups and users
- complete customization to each facility with a quick and easy deployment that can be scaled across multiple enterprise-wide locations.
- both web and mobile applications that provide reporting and statistics that give you the ability to access live data, view current statuses, and extract information quickly.

Return to work and campus safely, mitigate compliance liability, control cost and drive accountability with CleanTraQ.
